EMAIL ARCHIVING, COMPLIANCE AND DISCOVERY SOLUTION TO BE OFFERED BY EMPIRE SOFTWARE SOLUTIONS.

Empire Software Solutions announces that it has put an Agreement in place to be a reseller for Sherpa Software. The amount of email and attachments that State and Local Governments must handle is growing at a rapid rate. Governments need a solution that will allow them to better manage this while complying with “e-discovery” and FOIL requests.

“We looked at several solutions to address this issue and decided on Sherpa because of their extensive development experience with Lotus Notes. Many of our State and Local government customers use Lotus Notes so we wanted to partner with a company that had a solid understanding of the Lotus environment in addition to Exchange” explains Mike McGuire (VP of Business Development).

“Empire Software Solutions brings extensive experience in working with State and Local Government and we look forward to partnering with them to provide leading email management solutions to their customers” said Jim Leathers (Sherpa Business Development Manager)

Empire Software Solutions works with our Customers to determine the right products for their Organization and then makes sure they get properly installed and provide the anticipated benefits.

Empire Software Solutions identifies and then represents software companies that offer solutions that will benefit state/ local government and public safety.
