**TO BE OFFERED BY EMPIRE SOFTWARE SOLUTIONS.**

Empire Software Solutions announces that it has put an Agreement in place to represent TimeForce Software from Qquest Software Systems to State and Local Governments in New York State. TimeForce is the key to proficient and successful time tracking and management in the workplace.

“State and Local Government in NYS are under a great deal of pressure to control costs and be accountable to the public. Since employee wages constitute such a large share of the budget it only makes sense to have tracking and management tools in place. Qquest is a proven leader in this field and we are pleased to partner with them.” said Mike McGuire (VP of Business Development).

“Empire Software Solutions has positive working relationships with many State and Local governments in New York and together we can provide a solution that can dramatically assist governments in controlling employee costs” stated Amy Zambrano (Manager Strategic Alliance Division, Qquest Software Systems).

Empire Software Solutions works successfully with State and Local government agencies to determine the right products for their organization and then makes sure they get properly installed and provide the anticipated benefits.

*Empire Software Solutions identifies and then represents software companies that offer solutions that will benefit state/local government and public safety.*
