**Warren County Sheriff's Office to Distribute Accident Reports with PoliceReports.US**

Last month the Warren County Sheriff's Office became the second NYS Sheriff's Office to offer online distribution of the MV104A with the software service from PoliceReports.US. "This will save our Records staff the significant amount of time they currently spend handling requests from insurance companies." stated Chief Deputy Shane Ross "In addition the County will receive \$2 for each report that is distributed"

The Warren County Sheriff's Office located in Lake George, NY has year round population of over 66,000 with over 250,000 during the summer months. Unfortunately, some of these visitors will need to get a copy of an Accident Report. At least now they can get it via the Internet when they return home.

"I have had the opportunity to work with the Warren County Sheriff's Office for many years on software projects and look forward to continued success with this one." stated Mike McGuire (VP of Business Development).
