Town of Clarkstown Police Improve Efficiency and Service with Online Accident Reports

This month the Town of Clarkstown Police Department became the first police agency in Rockland County, NY to start offering online distribution of Accident Reports with PoliceReports.US. “This will make our Records Division more efficient and provide a public service while being cost effective” stated Lt. Steve Morgan “Since there is no cost to the PD there really is no downside to this.”

The Town of Clarkstown Police Department with 165 sworn officers serving over 82,000 residents has been a leader in the use of new technology to assist in meeting their mission. The convenience of online access to accident reports is another example of this.

“I have had the opportunity to work with the Clarkstown Police Department on several software projects and this will be a beneficial addition.” stated Mike McGuire (VP of Business Development).

Empire Software Solutions identifies and then represents software companies that offer solutions that will benefit state/ local government and public safety.
